Health And Safety Declaration

The Control of Substances Hazardous to Health Regulations 2002

It is a requirement that all equipment returned to Solartron Analytical for any purpose be certified by the sender as "SAFE TO HANDLE". You are required to identify any substances or materials that the above mentioned equipment has or could have been exposed to since it left the factory. If any unit is likely to be contaminated with blood, bodily fluids, pathological specimens, other biohazards, chemicals or substances hazardous to health or any other hazard, it must where practicable be decontaminated prior to return for service repair. Solartron Analytical reserve the right to refuse to handle material which we feel could pose a risk to our service support staff even after decontamination.
